DESIGN FOR CODE CODE FOR DESIGN

I am a dedicated, hard worker who specializes in design and front-end development. I uphold the value of respect while remaining tactful as I guide clients to see their potential. It is my belief, and my approach, that we should design for the end user, while providing our clients with the best solutions and experiences; allowing their business to grow through clear, concise design, and open communication.

TOOLSET

- HTML5
- CSS3
